

Quark g_{1LT} : independent axial phase, $x_N = 0.1$, $Q = 5$ GeV, AV18
Future-pointing staple shown; past-pointing result is its exact negative.

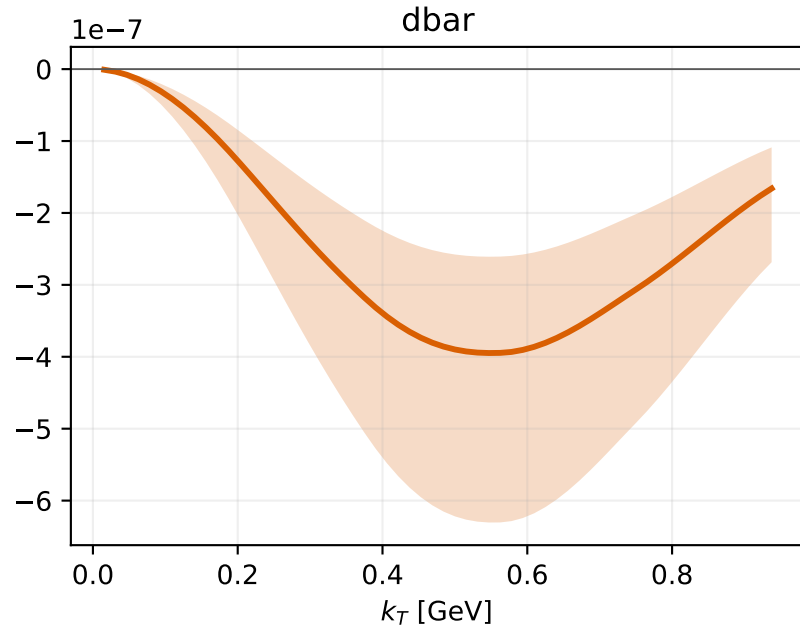

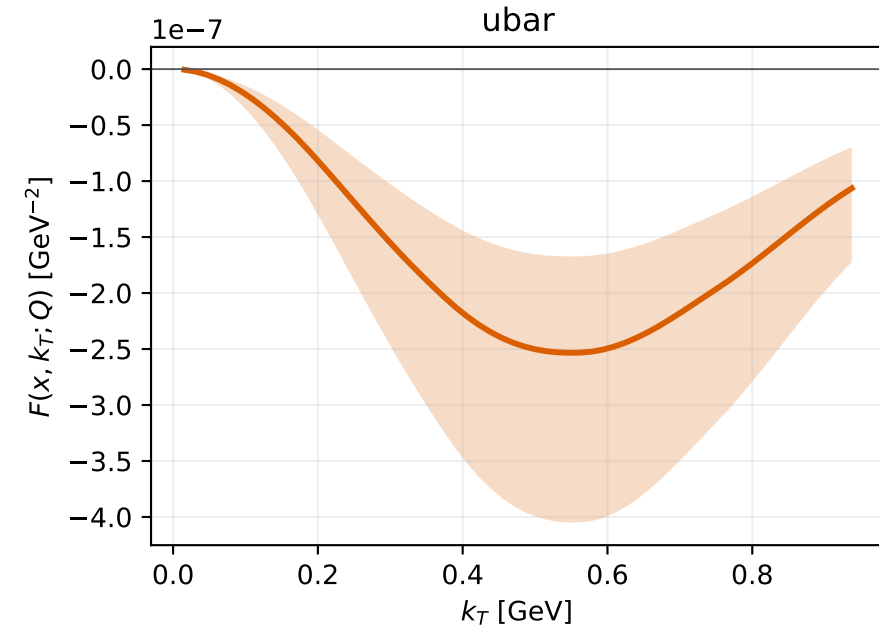

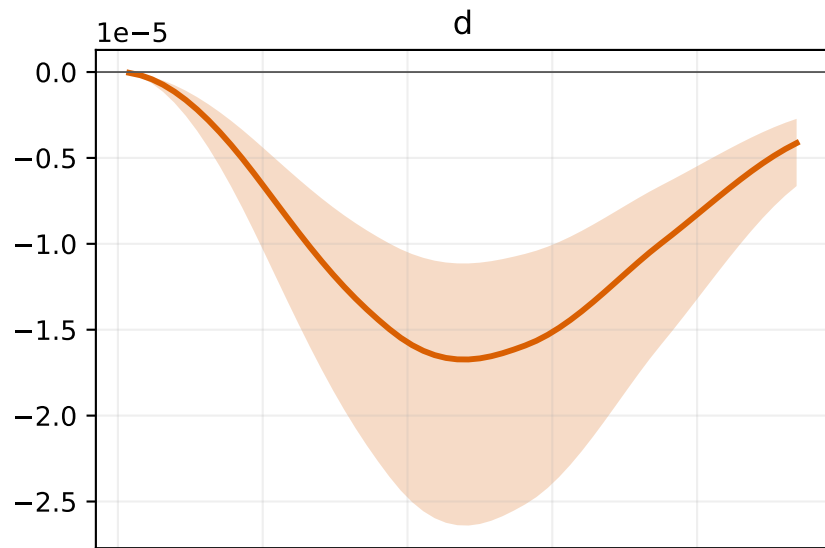

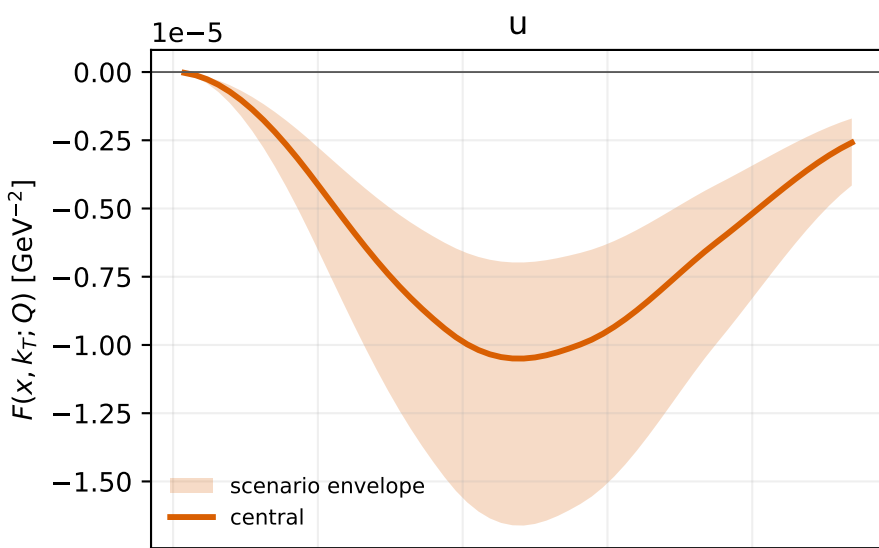

Quark g_{1LT} : screened one-gluon rescattering, $x_N = 0.1$, $Q = 5$ GeV, AV18
Future-pointing staple shown; past-pointing result is its exact negative.

Quark $g1T$: independent axial phase, $x_N = 0.1$, $Q = 5$ GeV, AV18
Future-pointing staple shown; past-pointing result is its exact negative.

Quark g_{1TT} : screened one-gluon rescattering, $x_N = 0.1$, $Q = 5$ GeV, AV18
Future-pointing staple shown; past-pointing result is its exact negative.

Central two-stage magnitude comparison, $x_N = 0.1$, $Q = 5$ GeV, AV18
